

Day 1: How the Web Works, HTML and CSS

Goal: Students understand the web in simple words, and build a styled Notes Board home page and an About page. No software installation is needed today.

Folder	Files
notes/	Day-1-Theory (read before class)
lab/	Day-1-Lab-Sheet (13 parts, numbered 0 to 12)
help/	Day-1-Stuck-Sheet
starter/	An empty page skeleton, and <code>css/extra-styles.css</code> (copied into <code>style.css</code> in Part 8c)
done/	The finished <code>notes-board</code> folder at the end of Day 1

Homework that Day 2 depends on

1. Students collect the installers into `Workshop-Installers` (see `../00-Instructor-Kit/installer-kit`).
2. Students create a GitHub account at home.
3. Students write down their questions.
